

## Haida 150 Series Lens Sets - for Super Wide Angle Lenses

The 150 series Filter Insert Holder set includes 1 holder and a lens specific adapter ring. As with all 150 sets there is minimal vignetting and no colour cast when using the Haida insert holder and Haida NanoPro filters together.

The Holder and rings are made from High Quality Aluminium CNC Material. Holds up to 3 Insert Filter glasses of 150mm width, 1.3-2.0mm thickness, light sealed. Haida NanoPro multi coated Filters are recommended and sold separately.

*The below are holder sets available for these specific super wide angle lenses:*
