

## Haida “Red Diamond” – 100 /150 Insert Filter Series Toughened Nano Pro MC Optical Glass Filters

The Red Diamond filter series from Haida Filter is the latest release and sure to be a big hit with Landscape Photographers.

Like red diamonds, “the hardest and strongest of all diamonds”, these new filters have been put through a special process which make them the strongest glass filters.

The Haida Red Diamond Series has the famous Haida Nano coating that is combined with a special process, making the glass twice as strong as normal filter glass.

*Simply put ... “The Red Diamond filters are much less prone to accidental breakage.”*

### Red Diamond Filters feature:

- Double Anti-break strength over a normal glass filter
- Low risk of accidental breakage
- Ultra-thin Nano multi coating retains superb image sharpness
- Faithful color reproduction and next to zero color cast
- Waterproof, Oil and Fingerprint proof, easy clean surface
- Scratch resistant for use in harsh environments
- R5 rounded design makes installation much easier into the filter holder
