

# 200LT-PL

## Technopolymer & Fiber Glass rectangular plate - 1/4" screw

Ideal for quickly attaching cameras onto all compatible Manfrotto products equipped with an RC2/Q2 attachment. Thanks to its lightweight body in technopolymer reinforced with extremely stiff glass fibres, the new plate always stays attached under the camera without adding extra weight or volume. It weighs only 31.54 g but supports up to 4 kg of gear.

The new rubber used on this product provides even greater grip, keeping the camera securely attached while ensuring maximum precision. The rubber on the 200PL Light is the same texture as the new leg warmers on the 190, 055, Befree and Compact models, also featuring a new design with the Manfrotto logo.

The 200PL Light plate is easily attached under the camera by rotating a special new flip with one's fingers - without any additional tools. The new flip is shaped like the Manfrotto logo, making the plate stand out and instantly recognisable.

### Technical Specifications

<b>attaches by</b>	1/4 UNC screw attachment type
<b>color</b>	black color
<b>material</b>	technopolymer
<b>max load</b>	4 kg
<b>plate type</b>	quick release - with 1/4" screw
<b>Product - Height</b>	10.5 mm
<b>Product - Length</b>	42.5 mm
<b>Product - Width</b>	53.5 mm
<b>quick release</b>	yes
<b>safety payload</b>	4 kg
<b>Weight</b>	0.039 kg
