

Friction Arms

Manfrotto enriches its available range of compact arms for photography and videography with the introduction of the new series of friction arms in two sizes 15cm and 24cm offering upgraded features and a payload up to 3kg. A dedicated series of interchangeable adapters are available. All arms feature an ergonomic adjustable knob that allows to achieve a high mechanical torque. All products are Made in Italy, in compliance with high quality standards.

The range is composed of 2 friction arms, available in four options:

244Mini
Mini friction arm

The attachments on top of each end can be replaced with a different adapter using the hex key which is included in the packaging.

The following kits are available:
spigot 5/8", hot-shoe, 3/8" and 1/4" adapters and anti-rotation adapter.

In this range, Manfrotto introduces the unique and innovative Anti-rotation system which is available both in 244Mico-AR and 244MicroKIT and also as a single adapter 244ADAPT38AR.

The Anti-rotation system connects to the "Easy Link" connection of Manfrotto 190 series and 055 series. The system prevents the load rotating when the arm is attached to the tripod through the "Easy Link" attachment.

Please note that the Anti-rotation system also works in combination with the new Nano Clamp 386B-1.

This brand new collection will replace the following arms that will be phased out with immediate effect: 823 Medium hydrostat arm, 814-1 Mini hydrostat arm, 819-1 Small hydrostat arm, 825 Medium hydro kit, 827 Small hydro kit, 830 Mini hydro kit.
