NOREG CAMERA BAG COLLECTIONS

Manfrotto introduces the Noreg family, a new concept designed for hobbyist photographers who use premium mirrorless cameras and enjoy drone photography, love to travel and want feature-rich photography bags with a unique, recognisable style. If you're a free spirit and prefer the journey to the destination, you're going to love both the **Noreg camera backpack-30** and the **Noreg camera messenger-30**.

The Noreg family's **cool colourways** combine with **minimalist shapes** and **premium textures** around a core feature that **references the essence of Scandinavian design: modularity**.

Designed to accompany travellers on the most amazing photographic journeys, Noreg carrying solutions are designed to keep all your photography kit and essentials with you wherever you go.

The new **Manfrotto Noreg camera backpack-30** is not just an **extremely versatile backpack**, it's also a **modular system** consisting of **2 detachable parts that can be used separately**. When you don't need your camera gear, **simply take the internal camera unit out**, undo the internal zippers and collapse the partition flaps to **convert it into a practical day pack**. When all you need is your photography equipment, just carry the camera unit like any shoulder bag. For your peace of mind, the Noreg backpack-30 features the **Manfrotto Protection System (MPS)** to protect your gear from shock.

NOREG CAMERA BAG COLLECTIONS

The new **Manfrotto Noreg camera messenger-30** is a perfectly adaptable companion for amazing photographic journeys. This versatile messenger is also an **innovative modular system consisting of 2 units** that can be used separately. The **internal camera unit** can easily be taken out and used as a **shoulder bag** when you only need your photography gear. A **multi-zippered front pocket** accommodates **extra accessories**, e.g. wallet, mobile, etc. There are pouches for your water bottle on either side of the bag.

Both the **Noreg camera backpack-30** and the **camera messenger-30** fit a **Premium Mirrorless camera** with **standard zoom lens attached** plus up to **2 additional lenses** depending on size (or 1 additional lens like the 70-200 mm f/4). It can also fit a **DJI Mavic Pro combo kit**.

Moreover, the **laptop compartment**, located on the back for extra security, can be **detached and used as a stand-alone laptop sleeve**. **Both models** also store a **15" laptop** and a **9.7" tablet** and feature a **tripod holder** on the front, so you can always have your favourite travel tripod with you.

With their stylishly understated look, **Manfrotto's new Noreg family make perfect companions for your adventures!** Their external fabric is water repellent and treated to withstand bad weather conditions. All materials and details are selected with the greatest care. The camouflage texture and cross-positioned straps set these bags apart, for a highly distinguished, new sense of personal urban style. Whatever gear you decide to take on your journey, your Noreg bag has the perfect carrying solution!
