Manfrotto's new Pro Light Bumblebee bags are perfect for professional photographers and videographers who work outdoors and want a reliable carrying solution that lets them stay comfortable in the harshest of conditions, despite high temperatures, extreme cold or high humidity.

Superior Performance, Quality & Comfort

Breathable design - Comfortable carrying solutions for professional & amateur outdoor photography

Super lightweight construction - Carry more lenses and stay comfortable even with prolonged use

High performance materials - Rip-stop fabric and Manfrotto Protection System safeguard equipment

NOW IN STOCK

The new **Manfrotto Bumblebee backpacks** are designed to take stress and heat off the shoulders, neck and lower back. Featuring Manfrotto's innovative **AirSupport** breathable harness and back panel, adjustable sternum support, shaped hip and waist support systems. A side handle helps users put the pack on or take it off, while elastic side pockets keep water bottles outside the critical gear zone.

The whole internal space is padded to protect camera gear, but can be also configured to accommodate 70% photography kit and 30% accessories and personal gear. The main zipper comes with 4 pullers which can be divided by a stopper into top & lower compartment.

MBPLB230

MBPLB130

Just open the top zipper for rapid access to frequently used contents from above.

A smart **NeverLose** tripod connection secures both longer and shorter tripods on the side of the pack. The connection straps are stitched in the side pocket & can be tucked away when not in use, for a tidier appearance and to prevent straps getting lost. The removable Manfrotto Camera Protection System inserts safeguard equipment right at the heart of the pack and keep it organized with the efficiency of a portable studio.

The new **Manfrotto Bumblebee messenger bags** have a signature **AirSupport** back & harness system not only distributes the weight among the long & wide shoulder pad but also maximizes breathability by the airflow mesh channel. A big **EasyGrip** buckle adjusts the length of shoulder strap in a second, enabling you to swing the bag quickly across body and take your next move. The messenger's water-repellent **Rip-Stop** nylon/polyester fabric, hollowed **ITW Nexus** buckles and Duraflex hardware make the pack both ultra-lightweight and strong enough to withstand the most intense use, ensuring long-term protection for large amounts of gear.

The messenger opens via the Velcro fastening or buckles. Apply the **NoiseFree** Velcro silencer for extra discreet use. The elastic **NeverLose** tripod connection is always ready to secure a mini tripod, monopod or camera pole. There are numerous external zip or stretchable pockets for accessories and a water bottle. This model comes with a **DuoFace** sun/rain cover,

which provides extra protection in rough weather and reflects sunlight, keep gear cool and dry all day long. Carry it on your shoulder, cross-body or using the grab handle, which can also be inserted onto a roller handle for easy travel.

NOW IN STOCK

The Bumblebee-230 PL backpack

Protects a gripped DSLR with a 70-200/2.8 lens attached and 10 extra lenses or an attached 400/2.8 with 5 extra lenses. In video configuration, it protects a disassembled modular camcorder like the Canon C100 with numerous lenses & accessories. It also fits a 17" laptop in its own padded compartment. The bigger Bumblebee-230 PL also features a lens pouch located in the waist belt. When not in use, it can be flattened by tightening the webbing strap. (This feature is not available in Bumblebee-130 PL)

Water-repellent Rip-Stop nylon/polyester fabric

MBPLB230

Features:

- Safeguards your pro gear e.g. Canon 5D4 + 400/2.8 unattached
- Breathable back & harness for extreme comfort and support
- Strong, lightweight construction for lasting performance
- Tuck-away strap system always ready to secure a pro tripod
- Quick and easy top access
