

RED BEE 210 PRO LIGHT

MBPLBPR -> All New Addition to the Pro Light Range!

The Pro Light RedBee-210 Backpack is a multi-feature solution designed for professional photographers looking for a capacious, lightweight bag that can hold two camera bodies and up to a 400mm lens. The new rear access feature allows you to configure your photo gear in the way that works best for you thanks to the flexible internal protective dividers. A special zippered mesh system keeps your gear separate from your laptop, tablet and other media equipment, which is safely stored and easily accessible in the back panel.

The RedBee-210 Backpack provides multiple access options: side access ensures fast-draw for your split-second camera needs and top access makes this bag the perfect choice for photographers wanting to be ready to capture every shot quickly and easily.

The bag comes with an external tripod connection and its own rain cover.

- Rear access
- Top and side opening for carrying 2 cameras
- 100% internal photo gear configuration
- External tripod connection
- Rain cover included
- Laptop & tablet storage
