

Pro Light FastTrack Bag

For professionals who prefer the most comfortable
and fastest carrying solutions

- MBPLFT8 -

For professionals who prefer the most comfortable and least cumbersome carrying solutions, Manfrotto introduces the new **Pro Light FastTrack 2-in-1 sling camera bag plus integrated camera strap** – the market's first ever camera sling to feature an integrated camera strap. This innovative carrying solution enables photographers to avoid kit that is not essential.

The new Pro Light FastTrack's **dual purpose** makes the job easier: photographers can now enjoy their favourite **CSC camera** (e.g. SONY Alpha 7, Alpha 7R II, Alpha 7S, Alpha 7S II, Alpha 7R III, Alpha 9) with the adaptable camera strap and quickly and safely store their CSC in the sling. With a single gesture and without detaching the camera from the strap. This process can be repeated fast. The **camera compartment locks** so users can concentrate on capturing the perfect image with full peace of mind. The camera strap connects via a secure camera attachment lock/unlock mechanism. The Pro Light FastTrack enables photographers to never get their bag's shoulder straps and camera strap tangled up again. Thanks to a **second, easy-access side compartment**, the bag also **holds 2 additional lenses** (e.g. a 70-200 mm f/4 and 16-35 mm f/4 in main compartment).

Like all Manfrotto Pro Light models, the FastTrack is made of strong-yet-lightweight, **reinforced water-repellent fabric** and sturdy but light hardware. It is built to carry heavy duty equipment and provide long-lasting comfort. The signature **Manfrotto Camera Protection System (CPS)** inside makes the camera sling strong enough to withstand the most intense use, ensuring the long-term protection of valuable gear. A dedicated device pocket fits a device up to 9.7" tablet and an internal bungee cord can secure a PIXI mini tripod. The Pro Light FastTrack also features additional pockets for accessories.

With Pro Light FastTrack, Manfrotto reconfirms its leadership as market innovator, pushing the limits of technology to create a brand-new product.
