- 6 carry-on roller bags specifically for cameras
- Unparalleled protection of photographic gear thanks to the Manfrotto Protection System (MPS)
- Peace of mind when travelling on assignments
- Ultra-compact and light design

Melbourne, September 2018 - Manfrotto, world leader in the photography, videography and imaging equipment and accessories industry, is thrilled to present its very first range of photographic trolleys: the Pro Light Reloader Collection. Consisting of six carry-on sized trolleys, the collection offers unprecedented lightness, protection and durability.

The Pro Light Reloader Collection is designed with the needs of professional photographers and videographers in mind. When travelling to assignment locations, it is essential to securely transport high-value photographic equipment with the peace of mind that it is perfectly protected, and the Pro Light Reloader collection is one-of-a-kind for security, compact size and light weight.

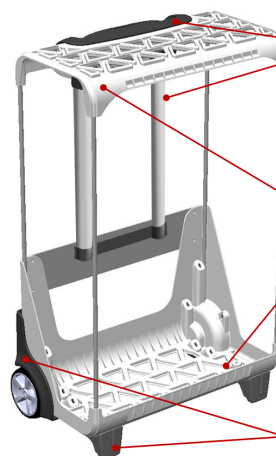

The Pro Light Reloader collection consists of six models.

RELOADER SWITCH 55

Pro Light Collection

MB PL-RL-H55

The Reloader Switch is the most versatile product in the Pro Light Reloader collection. This two-in-one roller bag can be turned into a professional camera backpack, simply by taking the padded shoulder straps out of the front pocket. It securely protects a pro DSLR with a 400mm lens attached, a second DSLR body and up to 3-4 lenses, or alternatively a modular camcorder lenses and accessories. In addition, it is equipped with **2 internal panel see-through pockets** for small accessories and an **easy-access front pocket for a 17" laptop and personal belongings**.

The shoulder straps are located on the front of the roller bag for extra padded protection on the front, as well as for enhanced comfort, preventing users from getting dirty and the wheels from digging into the photographer's back.

Its **reinforced corners, safe and smooth zip opening, improved protection trims and two separated bottom feet** for stability are what make the Pro Light Reloader Switch-55 so reliable. Furthermore, it features an **internal EVA moulded tray providing a solid structure, 14 protective dividers and 2 CPS dividers** to fully absorb shock, as well as **fixed TSA technology with an integrated 3-digit locking system**. All internal dividers can be moved at any time within the roller bag, according to the shape of the gear to be carried, providing ample customisation possibilities.

The water repellent bag comes with a rain cover so the user is fully prepared for extreme weather conditions. Two handles are located on the top and side of the roller bag.

The Pro Light Reloader Switch-55 meets international carry-on dimensions (55 x 35.5 x 23cm).

RELOADER AIR 50

Pro Light Collection

MB PL-RL-A50

The Pro Light Reloader Air-50's compact size meets the most stringent airline restrictions regarding carry-on luggage dimensions (50 x 35 x 20 cm). The front pocket maximises the capacity of the Pro Light Reloader Air-50. It can fit a Pro DSLR with a 70/200mm lens attached, a second DSLR body and up to 3-4 lenses, as well as a complete premium CSC kit. Additionally, it is equipped with **2 internal panel see-through pockets** for small accessories and an easy-access **front pocket for a 15" laptop** and personal belongings.

Extreme reliability is a key strength of the Pro Light Reloader Air-50, which features **reinforced corners, safe and smooth zip opening**, improved **protection trims** and **two separated bottom feet** for stability. Furthermore, it has an **internal EVA moulded tray providing a solid structure, 12 protective dividers and 2 CPS dividers** to fully absorb shock, as well as **fixed TSA technology with an integrated 3-digit locking system**. All internal dividers are customisable: they can be moved at any time within the roller bag, according to the shape of the gear to be carried.

All external fabric is water repellent and a rain cover is supplied in case of extreme weather conditions. Two handles are located on the top and side of the roller bag.

RELOADER AIR 55

Pro Light Collection

MB PL-RL-A55

Besides the Pro Light Reloader Air-55's clean and fresh look, this roller bag presents numerous functional features. Front and side pockets maximise the capacity of the Pro Light Reloader Air-55, which securely protects a pro DSLR with a 400mm lens attached, a second DSLR body and up to 3-4 lenses or a modular camcorder with lenses and accessories. In addition, it is equipped with 2 internal panel see-through pockets for small accessories and an easy-access **front pocket for a 17" laptop** and personal belongings. The Pro Light Reloader Air-55 meets international carry-on dimensions (55 x 35 x 23 cm).

Its **reinforced corners, safe and smooth zip opening, improved protection trims and two separated bottom feet** for stability are what make it so reliable. Furthermore, it features an **internal EVA moulded tray providing a solid structure, 14 protective dividers and 5 CPS dividers** to fully absorb shock, as well as fixed

TSA technology with an integrated 3-digit locking system. All internal dividers are customisable: they can be moved at any time within the roller bag, according to the shape of the gear to be carried.

All external fabric is water repellent and a rain cover is supplied in case of extreme weather conditions. Two handles are located on the top and side of the roller bag.

SPIN 55

Pro Light Collection

MB PL-RL-S55

The Reloader Spin has a **polycarbonate external shell** and an **internal EVA moulded tray**, maximising its capacity and lightness and minimising shock, to provide full protection of valuable photographic gear. It incorporates **four double spinner wheels** that help professional photographers and videographers transport heavy gear, making the Pro Light Reloader Spin-55 easy to manoeuvre in the most crowded spaces.

The Reloader Spin can accommodate the following photographic gear: a Pro DSLR with a 70/200mm lens attached, a second DSLR body and up to 3-4 lenses, a premium CSC with additional lenses, plus a DJI Mavic Pro combo kit in addition to a **15" laptop, which is accessible via a fast front access**. Photographic gear is accessible from the main access, as well as from a secondary access.

The Pro Light Reloader Spin-55 has a solid structure composed of **12 protective dividers and 2 CPS dividers to fully absorb shock**, as well as **fixed TSA technology with an integrated 3-digit locking system**.

Functionality is the standout characteristic of the Pro Light Reloader Spin-55. **All internal dividers are customisable**: they can be moved at any time within the roller bag, according to the shape of the gear to be carried. Furthermore, the **internal configuration pouch can be used as a photo protective compartment, or easily removed to turn the Reloader Spin into an everyday travel bag for a 2-in-1 travel experience**. When using the Reloader Spin-55 as an everyday suitcase, the inner cross ribbons can retain personal items and prevent them from moving.

The Pro Light Reloader Spin-55 meets international carry-on dimensions (55 x 35.5 x 22cm).
