MANFROTTO LENS FILTER SUITE

A complete new filter system for your camera

Manfrotto introduces the new Lens Filter Suite, a complete system combining high quality photography filters with easy-to-use patented Manfrotto XUME Adapters (Pronounced "ZOOM"). This new game-changing solution provides a feature set that is unrivalled on the market: the magnetic coupling system gives enhanced fluidity to your workflow, saving the lost time and tedium of installing and removing your filters. Experience the breakthrough Manfrotto Lens Filter Suite.

FILTERS AND
XUME ADAPTERS
ARE AVAILABLE
IN 49, 52, 58, 62,
67, 72, 77, 82 MM.

A wide range of filters

All Manfrotto's glass filters are manufactured in Japan according to strict quality guidelines and deliver uncompromising performance. Manfrotto filters are made of the finest optical glass and are designed with ultra-thin frames, minimising vignetting. Double-sided, anti-reflection coating reduces reflections for clearer images.

XUME ADAPTERS PARTS

1 LENS ADAPTER 2 FILTER HOLDER 3 LENS CAP*

Just "click" it

Manfrotto XUME Adapters are the revolutionary magnetic solution that enable photographers to forget about filters and focus on their shots, and change filters instantly when they need to.

* The Manfrotto XUME Lens Cap works only with the 77mm Manfrotto XUME lens adapter. The filter needs to be detached.

UV Filters

UV filters block ultraviolet light from entering the lens and therefore reduce blurring, haziness and blue casting. Simultaneously, they are highly useful

tools to protect the lens against dust, moisture and can permanently remain fitted without affecting the image.

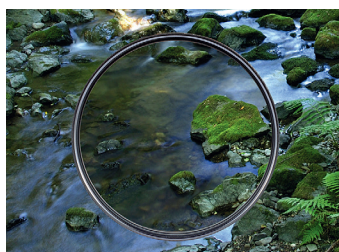

CIRCULAR POLARISING Filters

Circular Polarising Filters are ideal for landscape photography: they enhance colour, contrast and saturation and remove unwanted reflections from non-metallic surfaces such as water, glass and other reflective

surfaces. Polarisers affect the physical characteristics of light and work by filtering out sunlight that is directly reflected towards the camera at specific angles.

Enhance colour, contrast and saturation

Remove unwanted reflections and glare

Feature Tables

CIRCULAR POLARISING FILTER

	OUTDOOR	ADVANCED	PROFESSIONAL
COATING	2 LAYERS	12 LAYERS	12 LAYERS
LIGHT TRANSMISSION	68.0%	68.1%	90.0%

LIGHT TRANSMISSION	99.0%	98.8%	99.3%
WATER REPELLENT	✓	✓	✓
OIL REPELLENT	NO	✓	✓
SCRATCH RESISTANT	NO	✓	✓
ANTI-STATIC	NO	NO	✓

NEUTRAL DENSITY Filters

Neutral Density Filters help control exposure times by reducing the amount of light hitting the camera sensor without altering the colour of a scene. They are useful in a variety of situations, for example in low shutter

speed photography, to express the motion of moving objects through long exposure times, or to eliminate them from a scene.

Available in 3, 6 & 9 stops.

Create Misty Seascapes

Create Serene Landscapes

PROTECT Filters

Protect Filters are the ultimate in lens protection against dirt and damage thanks to 12 coated layers. Water-repellent coating effectively keeps water droplets off the lens, while

unique anti-static coating repels dust and dirt caused by static electricity. Oil-repellent coating protects against oily substances, stains and fingerprints.

XUME Adapters

STEP 1
Secure the XUME Lens Adapter to your camera lens.

STEP 2
Secure the XUME Filter Holder to your Manfrotto Filter.

STEP 3
Click the XUME Filter Holder onto your camera lens.

STEP 4
Remove your filter and click the XUME Lens Cap* onto it when you've finished.
