

Aluminum Fluid Monopod

with 3/8" top attachment, 4 sections

The MVM250A is a fluid video monopod that features a patented system using a fluid cartridge incorporated into the base that gives an incredibly smooth and judder-free panning action to the monopod when shooting video. Great compactness when folded thanks to its three retractable feet.

Closed Length	67 cm
Colour	Black
Maximum Working Temperature	60 °C
Minimum Working Temperature	-10 °C
Safety Payload Weight	8 kg
Leg Sections	4
Maximum Height	191 cm
Minimum Height	67 cm
Safety Payload	8 kg
Weight	1.2 kg
working height	13 cm

Smooth action in any direction

Foldable feet

Fluid Base

with retractable feet for monopods (ø20mm tube)

Fluid base that quickly transforms a photo monopod into a video monopod adding the fluidity feature onto the PAN movement. MVA50A can be easily attached on the last section of a photo monopod and is suitable for:

- Manfrotto 679B, 680B and 558B
- all monopods featuring a ø20mm tube in the last section

Material	Aluminium
Safety Payload	8 kg
Weight	0.380 kg
