

befree GT XPRO

Boundless creative freedom for macro photographers on-the-go

The Befree GT XPRO is the first Manfrotto Travel Tripod developed for **professional macro photographers**. A new travel tripod that combines portability with maximum versatility enabling the most creative photographers to push their limits.

The Befree GT XPRO aims to properly satisfy all photographers using **heavy gear ensuring a secure shooting experience, even at the most creative angles** and in the most far-fetched circumstances.

With the ergonomics and intuitiveness of the Befree GT setting controls with the highest level of portability, the Befree GT XPRO features a **built-in 90° column mechanism** in its top casting, which stays safely stored away until needed.

Not only does this system allow the camera to be **offset** from the legs' position, it also provides the simplest possible way to **shoot from ground level or directly overhead**.

The Befree GT XPRO mounts the Manfrotto 496 Center Ball Head with **independent panoramic and friction knobs** for smooth movement and remarkable locking power to support 10kg of photography gear.

The MH496-BH also comes with the **200PL-PRO**, a revolutionary plate that attaches to both a standard Manfrotto **Quick Release and Arca Swiss style mounts**.

Unlock the knob on the spider and push the button underneath the column

At the same time, raise the center column completely until the red shells pop out

Rotate 90° the center column, chose the right direction for the shot and lock the knob

Aluminium - MKBFRA4GTXP-BH

Carbon Fibre - MKBFRC4GTXP-BH

Weight	2 kg
Material	Aluminium
Color	Black
Min Height	9 cm
Maximum Height (With Center Column Down)	142 cm
Maximum Height	162 cm
Closed Length	43 cm
