

# 190go!

The 190 go! completes the advanced hobbyist and professional offering with a more compact and easy to transport version of the successful 190 tripod.

The new 190 go! is the lightest and most compact 190 in the Aluminum range. The new 190 go! closed size is 45 cm and weighs 1.7 kg. That's 4 cm more compact and also 20% lighter than the MT190XPRO4

The new twist locks allow the easy opening and closure of all sections at once with a single hand, making it ultra-fast to operate the tripod. Twist locks occupy less space compared to a lever, making the tripod light and compact.

The 90°column mechanism is hidden inside the tripod's top casting until it's needed; the mechanism can then be raised with a single finger, allowing the centre column to swing to the horizontal position. Together, the 90°column and the 4 leg angles enable you to get low down to the ground like no other tripod.

Taking its lead from our professional equipment lines, an Easy Link attachment in the top casting turns the tripod into a mobile studio and allows it to hold an LED light, reflector or other accessories.

The 190 go! is made in Italy by Manfrotto.

## Aluminum 4 Section Tripod with Twist Locks & 3 way head

MK190GOA4TB-3W

The 190 go! completes the advanced hobbyist and professional offering with a more compact and easy to transport version of the successful 190 XPRO. Combined with the new 804 Mark II 3 way head, it delivers compactness and reliability together with great precision and tilt motion assistance.

The new twist locks allow the easy opening and closure of all sections at once with a single hand, making it ultra-fast to operate the tripod. Twist locks occupy less space compared to a lever, making the tripod light and compact.

The 90° column mechanism is hidden inside the tripod's top casting until it's needed; the mechanism can then be raised with a single finger, allowing the centre column to swing to the horizontal position.

Together, the 90° column and the 4 leg angles enable you to get low down to the ground like no other tripod.

Taking its lead from our professional equipment lines, an Easy Link attachment in the top casting turns the tripod into a mobile studio and allows it to hold an LED light, reflector or other accessories.

This kit comprises the Manfrotto's most compact, precise and reliable 804 Mark II 3-way photographic head.

Constructed of ultra durable and lightweight technical polymer, the new 804 is now even compact thanks to the new retractable levers, with ergonomics handles provided with rubber. The new patented 804 has a unique spring feature to assist in the tilt motion of the head to compensate for heavier, off-centre loads. Moreover the standard quick release plate fits snugly in the low-profile receiver.

### Features:

- 90° column system lets you shoot from new perspectives
- Twist Lock allows effortless fast set up and increases lightness
- New Leg Angle Selector allows smooth operation
- The Easy Link allows you to add accessories to the tripod such as an LED light or reflector
- New 804 Adapto 3Way head ideal for precise framing on all 3 axes

<b>Material</b>	Aluminium, Technopolymer
<b>Leg Type</b>	Single
<b>Leg Lock Type</b>	Twist Lock
<b>Closed Length</b>	56.5 cm
<b>Max Height</b>	158 cm
<b>Maximum Height (with center Column Down)</b>	134 cm
<b>Min Height</b>	7 cm
<b>Base Type</b>	Flat
<b>Colour</b>	Black
<b>Weight</b>	2.42 kgs
<b>Safety payload</b>	4 kgs
<b>Leg Angles</b>	25°, 46°, 66°, 88°
<b>Centre Column</b>	Rapid
<b>Head Type</b>	3 Way Head

### Ease of Use

## Aluminum 4 Section Tripod with Twist Locks & Ball Head

MK190GOA4TB-BH

The 190 go! completes the advanced hobbyist and professional offering with a more compact and easy to transport version of the successful 190 XPRO. Combined with the successful 496RC2 ball head it delivers compactness and reliability together with high shooting versatility and quick framing.

The new twist locks allow the easy opening and closure of all sections at once with a single hand, making it ultra-fast to operate the tripod. Twist locks occupy less space compared to a lever, making the tripod light and compact.

The 90° column mechanism is hidden inside the tripod's top casting until it's needed; the mechanism can then be raised with a single finger, allowing the centre column to swing to the horizontal position.

Together, the 90° column and the 4 leg angles enable you to get low down to the ground like no other tripod.

Taking its lead from our professional equipment lines, an Easy Link attachment in the top casting turns the tripod into a mobile studio and allows it to hold an LED light, reflector or other accessories.

This kit comprises the extremely portable, lightweight and reliable 496RC2 Ball head. It gives the kit high shooting versatility and very quick framing ensuring excellent image quality thanks to the aluminium body.
