

PIXI EVO

PIXI EVO, the evolution of PIXI mini tripod. Enthusiast and hobbyist photographers who are deeply engaged in their passion and are looking for a lightweight portable solution will find in this tripod an extremely versatile, sturdy support for larger lenses. PIXI EVO perfectly fits their needs thanks to a rich feature set that provides flexibility of use, robustness and great variety of framing.

The Manfrotto PIXI EVO is the evolution of the already existing PIXI mini tripod. It has been designed as a lightweight portable solution to support cameras with larger lenses and its rich feature set provides flexibility of use, robustness and great variety of framing.

PIXI EVO tripod boasts two different leg angles with a sliding selector, enabling to shoot ground level images. Indeed another great innovation is its two-section legs, adjustable in five different steps adapting to non-level surface the footprint that will give the possibility to take low light landscape and architecture pictures with the maximum stability.

With PIXI EVO there is also the possibility to shoot in portrait mode, allowing the camera to tilt to 90° to capture incredible images, while ensuring great stability and precision for accurate pictures.

Compatibility

PIXI has been developed for entry level DSLRs fitting these basic requirements:

- Body: maximum weight of 750g/1.65lbs
- Focal length: maximum 18-200mm (standard non-professional lens)
- Total equipment payload: maximum 2.5kg/5.5lbs

Colour

PIXI Evo is available in three different colour combinations: the classic black version, the white and the red-anthracite ones.

Moreover, PIXI EVO supports a wide range of devices up to 2.5Kg/5.5lbs but it remains extremely lightweight thanks to its Adapto and aluminium construction and can be easily carried anywhere without ever feeling cumbersome.
