

## POP 30 Flash Diffuser

PH37213

### Phottix Pop Diffuser 30, a new and portable on or off camera Softbox.

The Pop 30 easily attaches to many popular hot shoe flashes, including the Phottix Mitros, and gives beautiful light.

When on-camera the Phottix Pop 30 can help diffuse the hard light from a flash, creating a larger, softer light source with attractive round catch-lights.

When off-camera the Phottix Pop 30 can be used up-close as a small Softbox - as a key or accent light - or as an on-axis fill light.

The Pop 30 folds up small and can be transported in the included carrying bag.

Setup is fast and easy.

The Pop 30 is an affordable lighting solution for Wedding Photographers looking to soften light and take more flattering photos.
