

Luna Deep Octa 100cm

PH82757

Modify and control light

The Phottix Luna Deep Octa 100 cm makes taking an deep octa on-location easy. It folds down and is easier to assemble than traditional softboxes. Constructed from high-temperature softbox material, it features internal fiberglass supports. Deep Octas create more diffused light, for softer light in photos.

With interchangeable Speed Rings this modifier can be used on many different studio strobes. Use it with a Bowens-compatible speed ring (included) and the Phottix Indra500 TTL Studio Light or with the Phottix HS Speed Mount II for use with a hot shoe flash. Speed rings for Profoto, Elinchrom and Balcar area available. (sold separately)

Modify and control light

The Phottix Speed Rings for Luna Softboxes and Globe Diffuser allow them to be used with studio lights from Elinchrom, Bowens, Profoto, or Balcar compatible mounts. The sturdy locking metal ring rotates to ensure that even when working in confined spaces, or at difficult angles, the speed ring can be easily mounted and rotated. Made from high-grade material it is durable and will withstand the demands of constant travel in a gear bag.

Diffusers and Luna products are sold separately.

Features:

Heavy duty and durable

Compatible with Phottix Luna softboxes, beauty dishes and the Phottix Globe Diffuser (30cm)

Rotates 360 degrees
