

Phottix®

Premio Parabolic Reflective Umbrella (85cm/33") - White & Black

The Phottix Premio series of Parabolic Umbrellas, feature innovative enhancements that make these premium and durable lighting modifiers. Designed for projecting a more focused, yet ever-so-soft quality of light onto your subject, the 85cm Phottix Premio Parabolic Reflective Umbrella - White & Black is a lighting tool you'll make frequent use of in the studio as well as on location.

Featuring an all-new locking mechanism, the Premio Reflective Umbrella features heavy-duty construction with fiberglass spokes that better guarantee clean catch lights in your subject's eyes. The white interior provides softer light with less contrast. An optional white diffuser is available, which effectively turns the Phottix Premio Reflective Umbrella into an equally durable and versatile softbox.

Phottix Premio Reflective Umbrellas - White & Black are also available in 85cm and 120cm sizes.

Mark Rigsby - MDR Foto Art, Houston

"This is an amazing shoot-through you have made... The light diffusion is fantastic. It spreads the light well and the backing helps the fall - off as the light gets closer to the feet while retaining definition. This is not something I can do easily with my single beauty dishes set-up unless I up the power. Even then it's not as even because it's a more concentrated light source"
