### Kali600 Studio LED Honeycomb Technical Specs:

|             |  |
|-------------|--|
| Model:      | Phottix Kali600 Studio LED Honeycomb         |
| Dimensions: | 215mm x 180mm x 15mm (8.46" x 7.09" x 0.59") |
| Weight:     | 0.123Kg                                      |

The 30 degree honeycomb grid helps control light and spill. The Grid magnetically attaches easily to the Kali600 Barndoors, and is perfect for adding a dramatic touch to video, portrait or product photography. Better feather hard light for more attractive shadows, as well adding depth to fashion images and emphasizing a model's facial structure.

When combined with the color gels, the Kali600 Grid can be used to project color backgrounds, casting color shadows as well as edge and rim lighting.
