

# Phottix Raja

## Quick-Folding Softbox

### Hail to the King

Softboxes are a must-have light shaper. Want to harness light, bend it to your will and make it your servant? Nothing is better than a Softbox. They provide for countless looks and possibilities – making your photographic potential limitless.

Given our past successes we've upped the ante. Introducing the Phottix Raja Softbox series.

#### The Phottix Raja series features:

Heavy-duty construction

Uses Phottix's Heat resistant SL Tech material

Easy to assemble

5 sizes and styles

Swapable speed rings for popular lighting brands

Travel Bag included

Assembling most Softboxes can lead to frustration. Speed Rings, rods, and fabric result in you bending and twisting like an Olympic diver to get the box assembled.

Not with the new Phottix Raja.

The Phottix Raja series opens like an umbrella and is ready to use in seconds. No anxiety. No frustration.

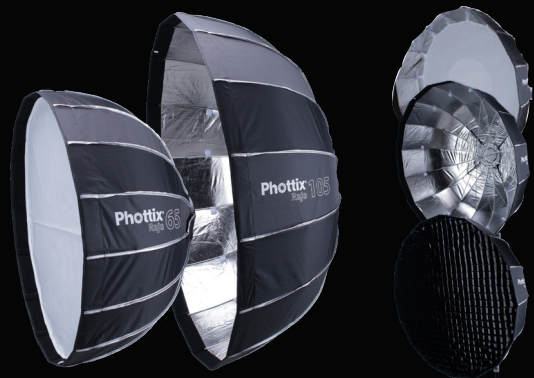

Pop, it open, add the baffle, diffuser and Grid – mount on your studio light.

Simple. You're ready to shoot.
