Aion Wireless Timer and Shutter Release

The Phottix Aion Wireless Timer and Shutter Release takes wireless triggering to the next level. The revolutionary wireless/wired timer and shutter release offers photographers an amazing number of triggering options, including auto-bracketing for HDR.

A medium range trigger capable of being operated from 60m it works on a universal 2.4GHz frequency. Easy to operate wherever you are the backlit LCD makes it suitable for use on a sunny day or in the dark.

Multiple timer functions:

- Self, interval and long exposure timers
- Number of frames setting
- Auto-bracketed timer setting for HDR photos

Multiple shutter functions:

- Two-stage shutter button for AF and shutter release
- Instant, continuous 5 shot, 2 second delay and bulb shutter release mode
- Cables for Canon, Nikon and Sony cameras included
