### Juno Built-in Transceiver Triggering

This transceiver function brings with it all the latest and greatest Phottix technology - 2.4 GHz, 100m+ range, 16 channels, 4 groups and Phottix' Digital ID function. Rounding out the triggering - the Juno is also compatible with other Phottix flash trigger systems and has two built-in optical slave modes - traditional slave

### Manual Ecosystem

The Phottix Juno and Ares II are part of Phottix' new manual ecosystem – For photographers that know the reliability of a non-TTL workflow.

### Ares II

The Ares II boasts the latest technology and is perfect for manual shooting with studio lights or hot shoe flashes. LDC Display, 16 channels with 150m range. A simple and reliable system.
