

Reflect Softbox

Studio Umbrella

PH85390

Modify and control light

The Phottix Softbox Studio Umbrella provides soft, diffused light. Small and compact, it can be assembled in seconds - much faster than a traditional softbox. It can be attached to a light stand with umbrella holder and is compatible with "speedlight" type flashes with a draw-string closes around flash heads.

This is a great light modifier, perfect for on-location work or in the studio.

Features:

101cm (40")
