

reddot award 2018
winner

Vitec Imaging Solutions wins Nine Red Dot Design Awards 2018 for its premium brands: Manfrotto, Gitzo, Joby and Lowepro, confirming the company's competence in delivering exceptional product design solutions and leading in market innovation.

We are proud to announce the Red Dot Jury has assigned **9 Design Awards** to four different consumer brands belonging to Vitec Imaging Solutions.

Since 1955, **Red Dot** has nominated the world's best product designs, basing on the criteria of **quality, functionality, innovation, ergonomics and durability.**

In the 2018 edition, more than 40 Jurors assessed over 6300 products, submitted by manufacturers of 59 different countries. To win a Red Dot Award means conceiving more than just an interesting product. Red Dot Awards are a symbol of remarkable functionality, only attained by designers who can fully understand their clients and their needs.

Vitec Imaging Solutions outperformed the competition for the quality, innovation and design, affirming the company ability of developing innovative solutions for imaging application under different brands who addresses professional photographers, imaging enthusiasts and the fast growing segment of video markers and independent content creators. Vitec is continuously investing in innovative devices to serve the emerging market trends, focussing on increased demand of video creation and consumption, developing pioneering technology like Manfrotto Nitrotech, the Befree Advanced and expanding the line-up of World Famous Joby Gorillapod products to rig for vlogging mobile journalism solutions.

MANFROTTO BEFREE ADVANCED

Befree Advanced is the ultimate foldable tripod dedicated to advanced hobbyist photographers who want maximum performance, even when travelling. High portability, solidity, easy set-up and operation are its features. Befree Advanced introduces the M-lock, for extremely fast and easy tripod setup. A new ergonomic leg-angle selector designed to be used by both right and left-handed photographers, to change shooting perspectives intuitively and precisely.
