MICROFIBRE

501120 Micro Fibre Cleaning Cloth, 1 piece

The triangular structure of the cloth filaments gives the Cloth its unique properties. Will clean the smallest dust particles, finger marks or grease spots from cameras and lenses. The cloth contains no silicon or chemicals and will not scratch shiny surfaces. Fully washable many times and can be ironed. Also suitable for cleaning CD's and DVD's.

- 21cm x 21cm square cloth

501122 Cleaning Cloth Optical Chamois, 1 piece

The Inca Optical Chamois Cleaning Cloth is a non-woven fabric. Made of ultra-micro fibers specially created through a multi-dimensional entanglement process, it is designed to eliminate fingerprint oils and other unwanted particles from camera and lens. It feels just like soft natural suede. Fully washable, non-shrinking.

- 16.5cm x 16.5cm Square cloth
